Dear colleagues and friends,

It is my great pleasure to welcome you to this meeting of the Cyprus Society of Pathology. We are delighted to bring together distinguished speakers and colleagues for a day dedicated to scientific exchange, thoughtful discussion, and professional fellowship.

In contemporary medicine, pathology stands at the heart of diagnosis and clinical decision-making, serving as a cornerstone of precision medicine and patient-centered care. By integrating morphology with biomarkers and molecular insight, our discipline continues to shape the present and future of modern healthcare.

This meeting reflects our shared commitment to advancing pathology, strengthening professional connections, and supporting continuous education in our field. I hope today's sessions will prove both intellectually rewarding and personally inspiring for all of us.

Thank you for your presence and support. I wish you a productive and enjoyable meeting.
